Profile

IT graduate with a strong foundation in web development, cybersecurity, graphic design, hardware and software systems, Linux, and networking. A proactive and adaptable problem-solver who embraces risks and challenges to deliver effective solutions. Skilled in designing and deploying applications, troubleshooting IT infrastructure, and leading technical initiatives. Experienced in both academic and real-world projects, with recognized achievements in cybersecurity competitions and leadership roles. Passionate about continuous learning, innovation, and contributing to modern IT solutions.

Education

Bachelor of Science in Information Technology — Lyceum-Northwestern University (2021–2025)

- Dean's List (2022–2023, 2023–2024)

- Cyber Security Club Officer (Public Relations, Technical)

Saint Columban's College — High School Diploma (2010–2014)

Happy Times Christian School Inc. — Elementary (2004–2010)

Certifications & Achievements

- Basic Computer Troubleshooting and Computer Literacy Sta. Barbara March 2025
- Safer Internet Day Webinar "Ctrl + Inspire: Influence Wisely, Navigate Safely" — Certificate of Attendance (2024)
- Figma 101: Introductory Workshop on UX for Students (Part 2) — Certificate of Participation (2024)
- Dean's List — Lyceum-Northwestern University (2022–2024)
- 2nd Runner-Up — Capture the Flag Cyber Security Challenge, Lyceum-Northwestern University (2023)
- 9th Place Overall — Hack4Gov 3: Region 1 | Team Cipher Ops (2023)

Technical Skills

Programming & Web Development: JavaScript, TypeScript, React, Next.js, Tailwind CSS, HTML, CSS, PHP, C, C++, C#, Vite, ShadcnUI

Design & Tools: Git, GitHub, Figma, Linux, Apache, Postman, XAMPP, HeidiSQL, Canva, Adobe Photoshop, After Effects, CapCut

Databases & Management: MySQL, MongoDB

IT & Networking: Cybersecurity, Ethical Hacking, System Maintenance, Networking, Hardware Troubleshooting, Computer Assembly/Disassembly

Leadership Experience

Public Relations Officer — Cyber Security Club, CICS (2024–2025)

Technical Officer — Cyber Security Club, CICS (2023–2024)

Projects

VenTubig: An Advanced Water Refilling Vending Machine

- Built an IoT-powered smart vending machine with Raspberry Pi, sensors, and a touchscreen.
- Integrated Stripe API for online payments and automated water dispensing controls.
- Developed a modern UI and optimized the system for efficiency and user convenience.

Task Manager with Gamification

- Designed and developed a productivity web app using Vite, TypeScript, and PHP.
- Implemented gamification mechanics (progress tracking, rewards system) to boost engagement.
- Responsive design with Tailwind CSS for desktop and mobile platforms.
